(2) S. IA. Gaidamovich, N. I. Grashchenkov, V. D. Soloviiev, R. M. Shen, A.M. Yurkovskii

Rabies. Edited by V. D. Soloviev. State Publishing House of Medical Literature. Medgiz, 1954, Moscow.

Table of Contents	Page
Introduction	,
	7
Epidemiology of rabies	1
Clirical characteristics of hydrophobia	23
Clinical symptomatclogy	2,3
Identification and treatment	37 <sup>1</sup> 53
Laboratory diagnostic of rabies	ЬO
Fixing fluids and processing of the material after fixation	47
Colomba of cuts	50
delement of emones and prints accesses sees sees sees sees sees sees	56
Biological test	59
Experimental rabies	62
	63
Rabies of laboratory animals	0,1
Means of artificial infection of the animals	63
Experimental disease	66
Experimental disease  The distribution of virus in an organism of the sick animal	70
Pathomorphology of the experimental rabies	73
Pathogenesis and immunity	81
Exportmental study of the rabies virus	RK
Characteristics of the street (?) and fixed virus of rabjes	90
Antirabies vaccine	98
The definition of pathogenesis of fixed virus of rabies for mice and rabbits in various means of infection	1,06
Stability towards influence of some chemical factors Immunogenic qualities	10 <b>7</b> 108
Medico-prophylactic aid to bitten patients	126
Complications in the nervous system at antirables inoculations.	143
List of Russian literature on rabies	151

(3) Scientific Session Held Jointly by the Academy of Medical Science of the U.S.S.R. and the Ministry of Public Health of the Uzbek S.S.R. on Problems of Regional Pathology. Summaries of Papers. September 20-25, 1954. Tashkent.

Methods of Collection of the Inhabitants of Rodents' Nests
Publication of the Academy of Sciences, U.S.S.R.

Moscow - 1953 - Leningrad

Totale of Contents	<u>Fage</u>
Forewordto the publication of the series, "Aid to the workers of the protective aforestation strips and workers of the great projects of communism"	3
Introduction	5
On types of rodents; nests	7
Excavation of the burrows	27
Nethods of taking apart the material which is used now	34
Recommended methods of collection of the inhabitants out of the redents, nests	35
Electrical thermoeclecter Keresene thermoeclecter	37
Additional hand destruction	41
Storing and preservation of the material	41
Further work in the laboratory	1:2
Tet contino	1,1,

Cytological Method of the Study of the Mechanics of Immunity.

State Publishing House of Medical Literature, Medgiz, Sverdlovsk Branch, 1947

Table of Contents	Pa, e
Introduction	3
Nothods of cytological research	4
Cytological study of pathogenesis of plague disease	6 7 11 14
Morphological characteristics of the condition of active immunity in the case of plague	25 26 30 38 41
Analysis of the processes which guarantee recovery to the immunal organism	142
The utilization of data, acquired during the sytological study of immunity mechanics for the improvement of the methods of proparation of antiplague, anti-endotoxic serum	56
<ul> <li>On the mechanics of inclusity in the case of lung type plague.</li> <li>a) Methods of experiments with lung plague.</li> <li>b) Immunity test in subdermally vaccinated animals with the infection of lung plague.</li> <li>c) Inhalation vaccinations of a live antiplague vaccine against lung plague.</li> </ul>	61 62 64 67
Cytological study of the reaction of the immunity in the lungs in the case of plague	72 73 75 80
	Introduction  Cytological study of pathogenesis of plague disease  Study of the reactions in the group of polymorphic-nuclear leukecytes  b) A group of lymphoid elements  c) Reactive processes in the case of plague in the elements of reticule-endothelial system  Morphological characteristics of the condition of active immunity in the case of plague  a) Reaction in the reticule-endothelial system  b) Vaccinal hyperplasia  c) The role of macrophagal reaction and vaccinal hyperplasia in the intensity of active immunity in the case of plague  d) The macheneis of exhaustion of active immunity in the case of plague  Analysis of the processes which guarantee recovery to the immunal organism  The utilization of data, acquired during the sytological study of immunity mechanics for the improvement of the methods of proparation of antiplague, anti-endotoxic serum  On the mechanics of immunity in the case of lung type plague  a) Mothods of experiments with lung plague  c) Inhelation vaccinations of a live antiplague vaccine against lung plague  Cytological study of the reaction of the immunity in the lungs in the case of plague  Reaction in the lungs to the subdernal introduction of the vaccino  Breaction in the lungs of the control animals infected by lung plague
